# マックステーピングA+ MAXTAPING® A+

Smooth body motion and physical fitness rely on sufficient muscle tension, muscle strength and muscle endurance. Abnormal postures, such as humpback, over exertion with muscle or repetitive movement, cause muscle fatigue or imbalance as well as increases loading on the body. Overtime, joints and muscles become weak and stiff, soft tissues become tight, with potential for inflammation. OPPO MAXTAPING® A+ provides extra support to reinforce affected soft tissue, such as muscle, tendon or ligament and unstable joint while reducing stress. MAXTAPING® A+ provides prolonged protection and dynamic support of joints during movements, when joints are repeatedly bending and stretching.

## The Mechanism of MAXTAPING® A+

The inflamed muscles cause constriction of the blood vessels, reduction of lymphatic fluid while affecting muscle and joint mis-alignment. Thus, the body is incapable of functioning normally during daily activities or exercise when muscles become hard to extend or contract due to injuries. OPPO MAXTAPING® A+ provides deep and concentrated massage therapy to damaged/adherent muscles and tissues when properly applied on the tender point. MAXTAPING® A+ improves lymphatic flow and circulation; facilitates lymphatic fluid into cells for nourishment and stimulates removal of metabolic waste effectively. MAXTAPING® A+ can relieve stiff, fibrous muscle and restore it back to its initial flexibility; toward normal range of motion. It helps reduce pain, edema and inflammation.

## Indications

- Muscle imbalance, pain and edema
- Supplementary treatment
- Degenerative disease
- Joint instability
- Overuse/ chronic pain
- Impingement
- Strain/ sprain
- Dysfunction of circulation and lymphatic flow

## Precautions

1. This product may cause skin irritation for some people. If any irritation or pain occurs, please remove it immediately.
2. Make sure skin is clean and dry. Do not apply to areas with open wounds or dermatitis.
3. Do not overstretch the tape.
4. Using soak gauze or a towel in soap water and wipe skin gently to remove residue remains.
5. Store MAXTAPING® A+ in a cool, dry environment and avoid direct sunlight.

## Features

### 1 Specific 4-Arc pattern

- **Centralized deep massage:**  
Specific 4-Arc application technique deeply massages stiff muscles to facilitate lymphatic flow, restoring muscles back to its original flexibility while reducing pain, edema and inflammation.
- **Dynamic support:**  
Multidirectional support and recoil force, improving joint stability and muscle function during motions.
- **Easy application:**  
4-Arc design for easy application on tender or rigid area.

Centralized deep massage

Dynamic support

### 2 Superb material

- 4-way stretch material allows tape to stretch in all directions without restricting muscle and joint movement, even throughout prolonged use.
- Super lightweight, quick-drying cloth decreases the potential of skin irritation and provides greater breathability throughout prolonged use.

Intermittent wave pattern

### 3 Intermittent wave pattern adhesive

- The intermittent wave pattern helps lift the skin to improve circulation and reduce pain or edema when properly applied.

## Basic Application

Remove the tape from separator. Carefully hold the tape to prevent it from sticking together.

Apply tape to the patient in a neutral posture. Do not stretch the tape. Make sure the center of tape is applied over the painful or affected area.

Begin by taping 2 strips of tape on each side of the wider tape starting from outside strip. Pull the outside strip away from the center strip, then repeat this step with the inside strip. Use both hands to pull the tapes to form a trapezoid.

Repeat step 3 on the opposite side to form a hexagon. After applying the tape, hold for 5 seconds to allow glue to bond with the skin.

Quantity	• OPPO 8095 10 sheets/pack • OPPO 8195 10 packs/box
Size	• S (14cm / 5.5") For wrist / foot / ankle • M (18cm / 7.0") For elbow / shoulder / knee • L (22cm / 8.7") For neck / back / leg
